

DR. TODD MADERIS

Coagulation Testing Instructions for Quest Diagnostics

(Please give this to the phlebotomist at Quest)

Antithrombin II Activity (8267)	2 mL frozen plasma collected in a 3.2% sodium citrate (light blue-top) tube
Lipoprotein (a) (34604)	1 mL Serum
Alpha 2 Antiplasmin (4953)	1 mL plasma collected in a 3.2% sodium citrate (light blue- top) tube
D-Dimer, quant (8659)	One full unopened 3.2% sodium citrate (light blue-top) tube
Fibrinogen Activity (461)	One full 3.2% sodium citrate (light blue-top) tube
Plasminogen Activator Inhibitor (36555)	1 mL frozen plasma collected in a 3.2% sodium citrate (light blue-top) tube
Prothrombin fragment (37674)	1 mL frozen platelet-poor plasma collected in a 3.2% sodium citrate (light blue-top) tube
Factor II Activity, Clotting (331)	1 mL frozen platelet-poor plasma collected in a 3.2% sodium citrate (light blue-top) tube
Homocysteine (31789)	1 mL serum
Protein C, Activity (1777)	1 mL frozen platelet-poor plasma collected in 3.2% sodium citrate (light blue-top) tube
Protein S, Activity (1779)	1 mL frozen platelet-poor plasma collected in 3.2% sodium citrate (light blue-top) tube
Thrombin-Antithrombin (TAT) Complex (10162)	1 mL frozen platelet-poor plasma collected in 3.2% sodium citrate (light blue-top) tube
